With you every step

TINYWALK

Encouraging those all-important first steps.

TinyWalk is a weight-relieving gait-trainer, which gives dynamic support throughout the rise and fall of the pelvis during ambulation.

As the child steps forward, the active spring system allows the pelvis to drop down into the “heel strike” and “toe off” portion of gait, and then assists with elevation to allow for proper “swing-through.”

Features

- ✓ Hands-free to interact with the world
- ✓ Open to front and side presents minimal barriers
- ✓ Secure support at hips and chest
- ✓ Posterior support
- ✓ Spring mechanism gives weight relief
- ✓ Tilt function
- ✓ Uncomplicated adjustments that allow for growth
- ✓ Easy to move and transport
