With you every step

WALKABOUT

Dynamic Gait Trainer

Open to the front and sides, securely supported at trunk and pelvis, the well-supported child is free to explore and interact.

The Walkabout is a spring-assisted weight/relieving posterior Gait-trainer for those who cannot fully weight-bear. Walkabout gives dynamic, active support throughout the normal rise and fall of the pelvis. Designed for years 2 to 18+.

Walkabout gives the opportunity to learn reciprocal gait and to strengthen associated muscle groups.

Features
